CS 469 Homework 1
Due 09.27.12 (Thursday)

1. (About C.I.A. and A.A.A.) R-1.14, R-1.21

2. (Cryptography Issues.) C-1.10, C-1.11, C-1.17

3. (Passwords.) R-3.13, C-3.2, C-3.3

4. *Security through obscurity* is a principle that might come naturally to most of us – in order to make something secure, hide it! Give an example of a situation in which this principle does not really help with the security of a system. Then give an example of a situation in which it does.
